SIX	653	83	7.87	USD	0.70	1.50	0.90	1.90	SIX is unique, it has no MRC and lives of NRC + sponsoring	
		average:	6.51		average:	15.05	average:	24.39		
Notes:										
1) Assumption: utilise ports up to 85% or 40%					5) Port costs are per month (MRC)					
2) NetNod cost was divided by 2 because you get 2 ports					6) Setup/Installation fee amortised over 3 years, cabling fees not included					

	3) Annual membership fees are included in MRC			7) Published list prices were used except for INEX which was provided via IRC				
	4) Poke @JobSnijders if you spot errors			8) It was suggested to me that the average IXP port is utilised for 40%
